

Add Ons

The platform provides functionality to assist with various data collection and monitoring needs. It is described as a 'digital tool' box as its features can be used as and when required, and combined with one another.

To allow this flexibility of use, various subscriptions are available, and a number of these are accessible by navigating to **Account > Add Ons**.

Add Ons

Depending on the Tools and features you have enabled (i.e. Media/Trapping/Tracking, or Animal Recognition), you will be presented with the associated Add Ons for these services. These include the following:

Offline Image Upload Service

The Offline Image Upload Add-On allows transfer of images from offline files (i.e. images from trail camera SD cards not PERDIXPro enabled). Data storage allowances are charged on a per year basis and additional storage space can be purchased at any time.

SMS Notification

SMS credits are used for SMS alerts to Users (1 SMS per alert per receiving User) and Snapshot commands to PERDIXPro enabled cameras (1 SMS per command). SMS's added to your account remain available until used.

Animal Recognition (AI)

On request, the PERDIX team can apply Animal Recognition (AI) to your account. If applied, you can install the Image Recognition Add-On to allow the automated identification of different species captured in images taken by your PERDIXPro enabled cameras or via Offline Upload to your account from an SD card. This Add-On also allows you to receive alerts when selected species are identified in your PERDIXPro enabled camera images.

Form Builder

Install the Form Builder Add-On to allow the creation of digital forms for use in your PERDIXPro portal or Fieldbook App. The Form Builder provides users with a comprehensive choice of fields and elements to allow the creation of bespoke forms for your projects.
